

# ESCAPE With Future Heirlooms

The men and fathers spoke...The Escape listened. A new men's section welcomes customers into The Escape nowadays. Quality, handmade gifts for the special man/men in your life are being added continuously.

Men, even though sometimes hard and rugged on the outside often carry a softer, nostalgic inner core. You only need to ask him about that special knife or watch that his grandfather carried every day and which he now treasures...or the old character-rich leather briefcase his dad used all his life, to see that side of the man.

At The Escape there is a substantial collection of many gifts of the kind that will outlast us all and become the heirlooms passed on from generation to generation with ever-increasing sentimental effect.

Two lines are especially worth mentioning because, not only will they become heirlooms in future, but they already now carry a lot of extensive history with them.

Proudly American, Col. Littleton of Tennessee designs and makes leather products that uphold the time-honored traditions of our country such as handmade craftsmanship, quality workmanship and rich natural leather prepared in old fashioned ways. His products have a naturally nostalgic feel. They could just as well have been made a 100 years ago and many are made in the same way and with the same tools of that time. The leather they use have character from the start. **"John Wayne kind of leather"**, he calls it, with scrapes, nicks and barbed wire scratches – **"leather that shows some spirit"**! Just like that lever

action rifle of yesteryear that carries the stories of many a successful hunt, so would these leather products record stories of a lifetime while growing in treasurable character.

Going further back in time, Bill Wirtel and family in New Mexico make knives and other tools that carry with them pieces of history and treasures of long ago. Apart from exquisite gemstones worked into handle inlays, they also hand make handles from Ice Age Woolly Mammoth Tusks and Teeth out of Siberia (10,000 years old) and fossilized bones of Brontosaurus dinosaurs out of Utah (150 million years old). Their workmanship is outstanding and they stand firm behind their products. Holding one of these knives in hand, one cannot help but be in awe about the rare opportunity to cradle a piece of such old living history in your palms.

***Escape timelessly with extraordinary giving for him!***
